DETAILED ACTION

1. This communication is responsive to Amendment filed 04/28/2006.
2. Claims 60-61 are pending in this application. Claim 60 is independent claims. In Amendment, claims 1-59 are cancelled and claims 60-61 are added. This Office Action is made non-final after a RCE filed 02/08/2006.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
4. Claims 60-61 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 60-61 cite a system for performing a FFT according to a mathematical algorithm. In order for claims to be statutory, claims must either include a practical application at useful end or a discrete, useful, and tangible result. However, claims 60-61 merely disclose a system for performing a FFT in a general computer comprising one or more processors. Claims 60-61 disclose purely mathematical and abstract idea. Claims 60-61 fail to disclose a practical application at the useful end or a tangible result. Therefore, claims 60-61 are directed to non-statutory subject matter.

Response to Arguments

5. Applicant's arguments with respect to claims 60-61 have been considered but are moot in view of the new ground(s) of rejection.
